Visualization: Power BI, Tableau, Matplotlib
Tools: Git, GitHub, Jupyter Notebook

INTERN EXPERIENCE

- **3 Months Internship on Full stack development** at **incerd** company .
- Worked as an **Warehouse Associate** for **3 Months** in **Flipkart**.

Online Certified courses

Artificial intelligence Fundamentals([link](#))

Cybersecurity Fundamentals([link](#))

Information Techonology Fundamentals([link](#))

Cloud computing(vtu)

PROJECTS

LMS: Learning-management-system a simple web application ([link](#))

LMS a web-based Learning Management System designed to streamline online education, allowing administrators, instructors, and students to manage courses, assignments, and learning progress effectively.

Reunite:An Intelligent Lost and Found Management System([link](#))

- **Problem & Solution:** The difficulty in manually tracking and matching lost and found items is addressed by Reunite, an intelligent web-based system that automates item matching and improves recovery efficiency.

- **Tools & Technologies:** HTML, CSS, React.js, Node.js, Express.js, MongoDB, JWT authentication, and similarity-based matching techniques.; implemented responsive design and dynamic database management.
- **Result/Impact:** The system improves the efficiency and accuracy of lost item recovery by reducing manual effort, enabling faster matching, and increasing user satisfaction.

Swiggy Clone – Food Delivery Platform

- Built a responsive React.js food ordering platform.
- Integrated REST APIs for restaurant and menu data.
- Implemented search, filtering, React Router, and Redux Toolkit state management.

Netflix Clone – Movie Streaming Platform

- Developed a Netflix-inspired React.js application.
- Integrated TMDB API and Firebase Authentication.
- Created reusable components and responsive UI with movie categories and details.

ADDITIONAL INFORMATION

Languages: English, Hindi, Kannada(Native Proficiency).

Interests: Sports, Story Reading, Learning new skills.
